Welsbach Mantles

Style of mounting distinctively Welsbach. Ring-top Cap. Asbestos tied, nickle-wire support, sheathed with a refractory magnesia tube.

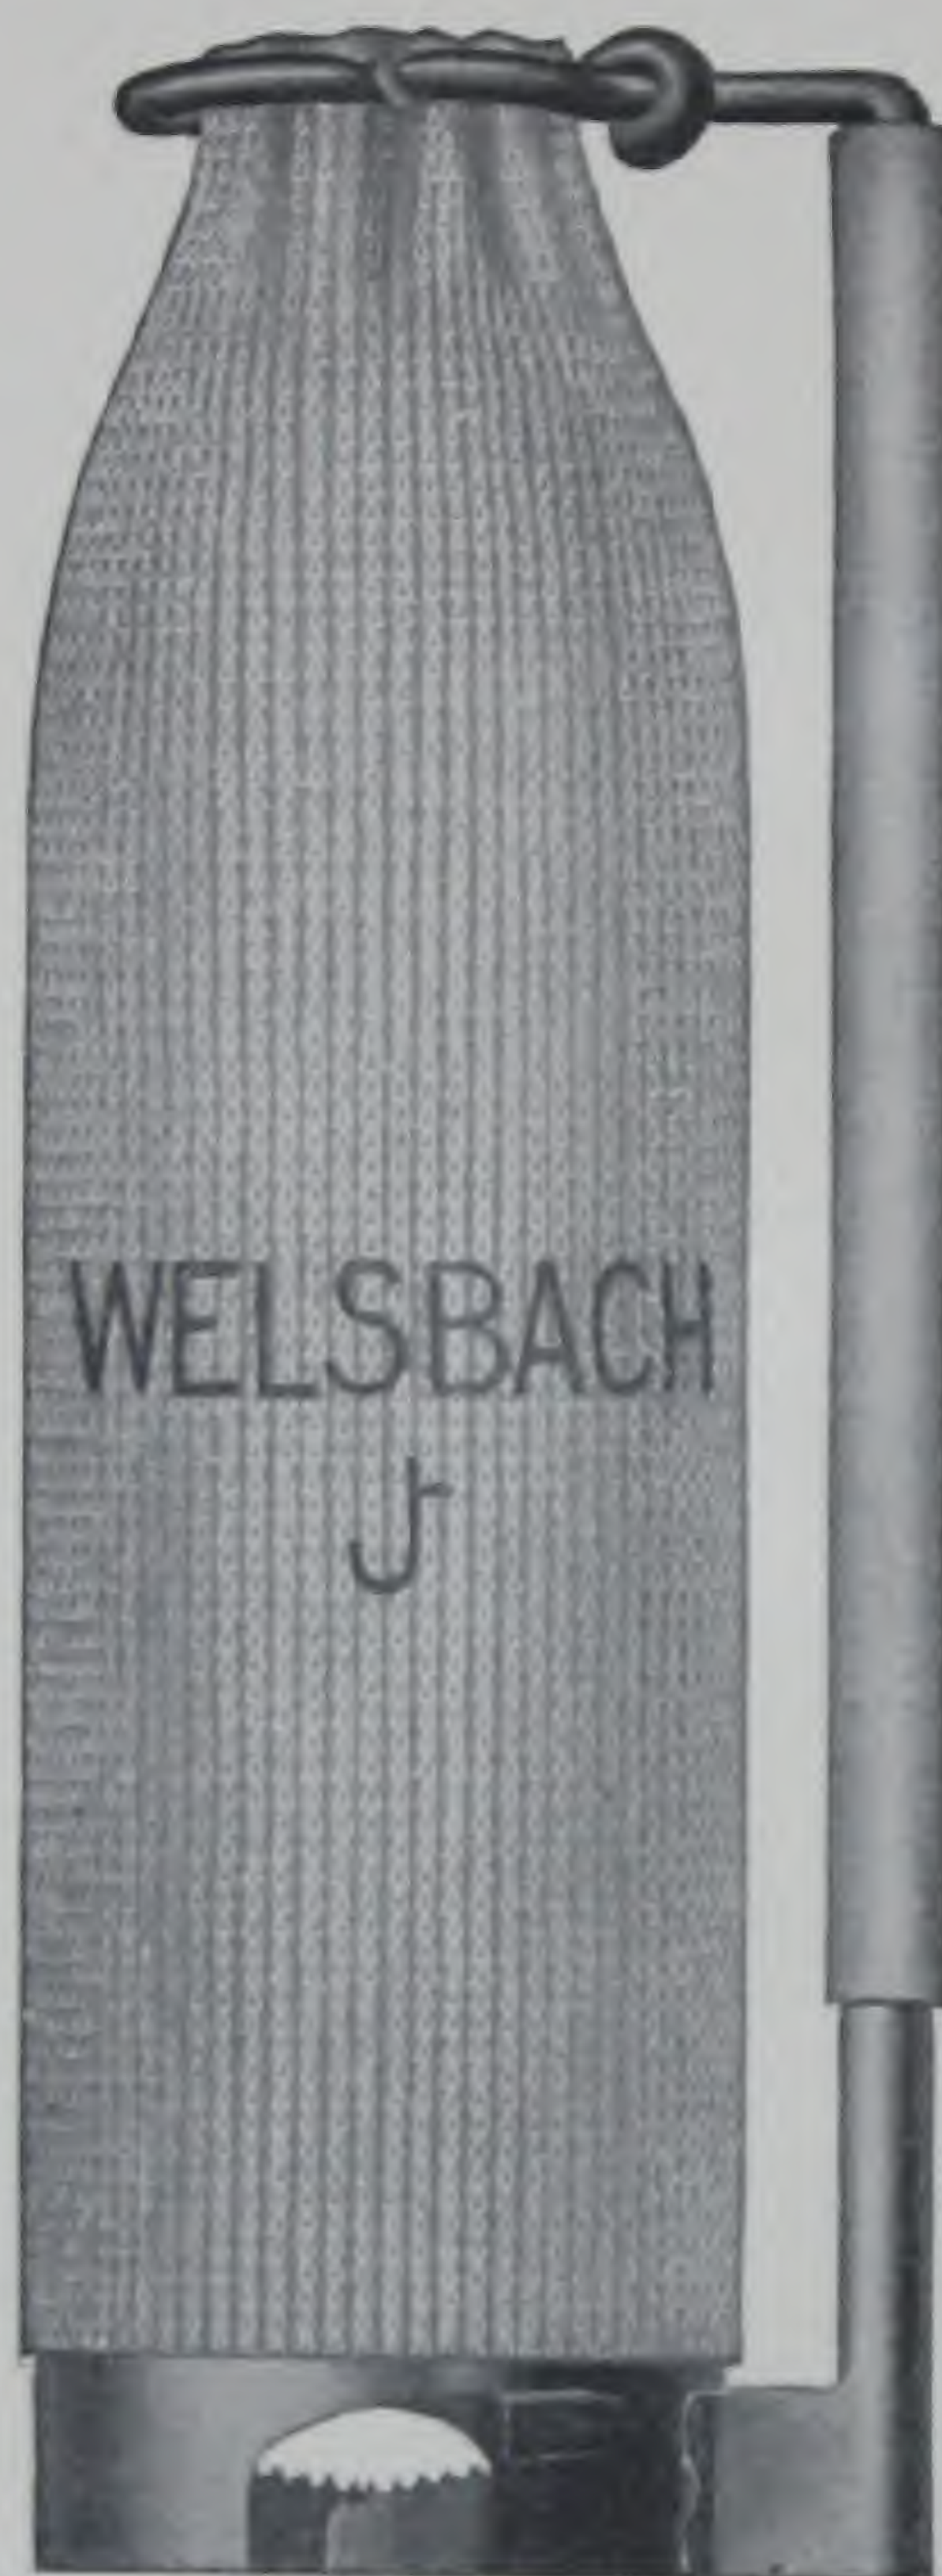

The maximum durability of this type of Welsbach Mantles is due to several features peculiar to Welsbach Mantles alone — mantle is rigidly suspended over the cap, thus preventing fraying or breaking at the skirt, due to vibration, the strain being taken up at the head of the mantle, which is hardened with a specially prepared chemical solution. Utilizing a refractory tube makes impossible the bending of the supporting wire.

Welsbach Gallery Burners

Burners quoted in case lots are F. O. B. Waterbury, Conn.

The large sales of the No. 82 Burner the past season indicate that the trade and fixture manufacturers appreciate the desirability of properly "dressing" a combination fixture. Its general lines closely follow the electric socket and 2¼-inch fitter permits the use of the same style and size globe on both electric and gas outlets.

A most pleasing effect in both illumination and artistic design.

No. 82 B.

A new Welsbach Burner for use on combination gas and electric fixtures. Finished in brushed or polished brass.

THE *Welsbach Junior* LIGHT

Burner, Needle Valve Adjustment - - **Mantle,** J Brand Welsbach - - **Chimney,** Air-Hole, Mica

The Welsbach Junior Light is 5 inches high—gives 50 candle power light—uses 2 feet of gas per hour—attaches to any gas fixture—is concealed from view by globe—and can be installed without extra cost for glassware.

The mantle is mounted in the chimney, and these two parts are sold combined. The chimney preserves the mantle from damage, both in handling and use, and is placed on the burner with the same simplicity as attends the renewal of an electric light bulb.

THE WELSBACH JUNIOR LIGHT

The Welsbach Junior Light is a boxed light, satisfactory from every standpoint, and is offered at a price so low as to compel popularity.
